Serious apprehension regarding injury by drought to cotton in Texas seemed justified by some dispatches published last week, so that telegraphic advice of somewhat general rain in the state is welcome.

Large sales of print cloths are reported at 21/c, slightly above the bottom price, but other goods have not yet been strengthened. Nor have woolen goods improved, but the tone is rather less hopeful and the demand for goods is even more slack than was expected and sales of wool at the three chief markets have been only 2,007,100 pounds for the week, against 12,715,500 last year.

Not much can be said of a market so flat as that of iron and steel products, but part of the inactivity is strictly seasonable, part is due to still unsectled questions about wages, and much more to a general disposition to defer are too high or not, they average relatively at least ten per cent. higher than prices of pig iron, which necessarily causes inaction when pig iron is going lower.

"It's a Good Thing. Push it Along."

Why buy a newspaper unless you can profit by the expense? For 5 cents you can get almost as much "BATTLE AX" as you can of other high grade brands for 10 cents. Here's news that will repay you for the cost of your newspaper to-day.

GOVERNMENT STAMP VALUE. One of "Coin" Harvey's Arguments for

Free Silver. "Suppose," says Coin's Financial School, "that congress should pass a law to-morrow authorizing the pur-

chase of 100,000 cavalry horses of certain sizes and qualities. Horses would advance in value."

This is one of "Coin" Harvey's argu-

ments to show how free coinage would raise the price of silver. It does not fit the case, because under free coinage the government would not purchase silver, but would simply stamp it and make it legal tender. Is it likely that the government stamp is going to greatly increase the value of silver? Will some of "Coin's" pupils tell how much the stamp "U. S." added to the value of this

THE REAL CURRENCY CONTRACTIONISTS. While the silverites are howling themselves hoarse over "gold standard contraction of the currency" the, people who believe in a steadily expanding volume of money should keep in mind the fact that free coinage at sixteen to one would be the greatest contraction measure of the age. It would put the country on a single silver standard, would drive gold out of use, would frighten investors into withdrawing loans, would make it impossible for the government to redeem its paper obligations in coin of any kind, would cause the suspension of banks by creating a panic among depositors, and by establishing a precedent for the repudiation of debts would greatly curtail the operations of our present credit system. If currency contraction is an evil, the people who favor expansion should vote to sustain the present system of gold and silver, under which the volume of money has increased from \$18 in 1873 to \$23 at the present time.

Farm Wages and Profits.

Ex-Gov. Boies, of Iown, says he cannot pay the present rate of wages and make his 3,500-acre farm pay. He says that no farmer who has to hire his help can make money at farming under the gold standard. Ex-Congressman Bland says that wages of all kinds will rise under free coinage.

It would naturally be inferred from

Boles' statement that he wants free coinage to lower farm wages so that the big farmers can make money out of the labor of others. Bland's opinion evi-dently is that free coinage would be a good thing for the farm laborer and therefore so far as wages are con-cerned, a bad thing for the boss farm-

ers.

The two leading free coinage cates should get together. It might also be well for farmers and "farm-hands" to investigate these conflicting
